

# PREMIRA® II Microfiber HighDuster Covers

## Single use covers for hard to reach areas

Compatible with standard commercial dusting wands, the advanced Premira II HighDuster Cover is an efficient and effective choice for hard to reach or difficult to dust critical surfaces. Compliant with the most up-to-date healthcare cleaning protocols, the microfiber fabric allows for quick pick-up of dust and debris on hard-to-reach ceiling vents, equipment arms, and OR lights. The textured surface does not lint or shed like competing products, or risk cross-contamination as launderables do.

Premira II HighDuster Covers can be used with the widest range of cleaners and disinfectants. Always follow site protocols. Use with Contec's flexible foam Snake Duster with rubber handle for additional surface conformity and ease of use.

Pair our flexible foam Snake Duster with our PREMIRA II HighDuster Covers to reach and clean a variety of surfaces.

features	benefits
<b>Microfiber Construction</b>	<ul style="list-style-type: none"> <li>• Consistently better cleaning with a microfiber face</li> </ul>
<b>Disposable cover</b>	<ul style="list-style-type: none"> <li>• Easily slips onto a variety of dusting frames</li> <li>• Eliminates cross-contamination risks of launderables</li> <li>• Readily available and controllable inventory, reducing EVS downtime and eliminating hassles of laundries</li> </ul>
<b>Lightweight alternative to feather dust wands</b>	<ul style="list-style-type: none"> <li>• Reduces operator strain while enhancing compliance</li> </ul>
