

## Description

---

This gamma irradiated sprayer comes with an adjustable nozzle that allows a flow rate of 0.4-0.5 gpm (gallons per minute), ideal for application of disinfectants. With a 48-ounce tank and light-weight 0.75lb construction it allows operators to more efficiently and effectively apply disinfectants, cleaning solutions and sterilants.

## Product Information

---

- Product: Suite Sprayer
- Part Number: S-RTS-1098-CIR
- Packaging: 15 Bottles/Case
- Sterility: Gamma Irradiation
- Stream: Vertical = 23 feet  
Horizontal = 25 feet

## Features and Benefits

---

1. This product comes double bagged within two case liners for use in Grade A and B areas
2. Deliver multiple spray patterns with the adjustable nozzle
3. The pump driven nature of the sprayer provides constant even pressure for applying solution in a uniform manner
4. The ergonomically designed trigger spray and light-weight design alleviates operator fatigue
5. Perfect for in-process disinfecting
6. Spray application is ideal for wheels, under equipment, and other hard to reach places
