

Description

The Suite Mop Pad with Mesh Pocket is a high-performance engineered cleaning product made from unique synthetic ultra-fibers. These fibers are non-particulating, snag resistant, and provide a thicker pad which has a larger absorptive capacity with unprecedented performance and durability for both cleaning and applying disinfectant.

Product Information

- Description: A thick and absorbent pad mop with pockets. Useful for cleaning or applying disinfectants on walls, ceilings, and floors in cleanrooms and controlled environments
- Non-Sterile Part Number:
 - Y-GL-PP515-25
 - Packaging: 5 mops per pack, 25 mops per case
- Sterile Part Numbers:
 - Y-GL-PP515-1S
 - Packaging: 1 mop per pack, 25 mops per case
 - Y-GL-PP515-25S
 - Packaging: 5 mops per pack, 25 mops per case
- Size: 15" x 5"

Product Performance

Test	Method	Result
Sterility	AAMI TIR33:2005	Validated Sterile to a 10 ⁻⁶ Sterility Assurance Level
Particles	Helmke Drum IEST-RP-CC003.4	Category 1 Acceptable for ISO Class 5 use

Reduction and Transfer: Wiping with Suite material has been demonstrated to *effectively remove surface contamination. In addition, the carry-over (cross contamination potential) after wiping with the Suite material is minimized as contaminants are fully retained by the material.

*Lab testing available upon request
